Global migration and the “great reshaping”

FOCUS
Give and take

26 | Underestimated inequality
Social inequities are increasing, yet no broad alliance for a greater redistribution of wealth has emerged in democratic countries. Why is this the case? And how do immigration and poverty influence attitudes towards state intervention?

34 | Not just in times of crisis
An analytical look at the state's economic and financial activities shows that rather than leaving everything to the market, the state has begun playing an active role in economic policy.

40 | Immunity – a balance between attack and defense
Everything has its price – especially health. But what might the evolutionary costs of perfect immunity be? And why are we not equipped to fight all pathogens?

KNOWLEDGE FROM

56 | Using a tree’s natural defenses
Trees stand for strength and steadfastness. This is because trees can neither run nor hide from enemies. Nevertheless, trees are by no means defenseless.

62 | Beyond the emergency
Five years ago, the arrival of thousands of refugees within a short period of time presented the administrative offices of the German municipal authorities with a huge challenge. How did they handle the situation?

64 | The light converters
The sun sends more energy to Earth than humanity needs. Special materials are designed to put this supply to use for a whole host of purposes.

70 | Risky cooling
Experts are discussing whether geo-engineering involving the targeted release of the gas could reduce global warming.
