MaxPlanckResearch reports on research currently being conducted at the Max Planck Institutes and is aimed at a wide audience with an interest in science. The editors endeavor to make even complex scientific content as comprehensible as possible. The magazine is published in both German and English, each with four editions per year. The magazine has a circulation of 80,000 copies (English version: 10,000 copies) and is free of charge. Reprint of texts is permitted only with the prior approval of the publisher; photographic rights may be granted by agreement. None of the views and opinions expressed in *MaxPlanckResearch* may be interpreted as representing the official views of the Max Planck Society and its associated bodies.

The Max-Planck-Gesellschaft zur Förderung der Wissenschaften e.V. (Max Planck Society) comprises 85 institutes and research facilities in which around 24,000 employees, including some 7,000 employed scientists, work and conduct research. The basic funding by the federal and state governments in 2022 was EUR 2.0 billion. The Max Planck Institutes focus on basic research in natural sciences and the humanities. The Max Planck Society is a non-profit organization registered under private law as an incorporated association. Its central decision-making body is the Senate, which includes members from the world of politics, the scientific community, and the professional public.

To improve readability, we have used only the masculine form in some of the texts. However, the chosen formulations address all genders equally. *MaxPlanckResearch* is printed using FSC®-certified and other controlled materials.
